-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is unclear, as it does not recite a sequence of process steps and does not define the bioremediation method.

Claims 2-4 also are unclear. For example, in claim 2, "such as" and "or any other material" are unclear as to what is being claimed. In claim 4, "easily" is unclear.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hard et al or Raskin et al.

Hard and Raskin each disclose bioremediation methods for radioactive water treatment, as claimed.

4. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Alvarez et al.

Alvarez discloses the treatment of radioactive waste water by an immobilized culture, as claimed.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Francis et al, Revis et al, Chaumont et al, German patent 44 33 413, or the Ashley et al article.

Francis, Revis, Chaumont, the German patent and the Ashley article each disclose the treatment of radioactive waste water by an immobilized culture, as claimed.

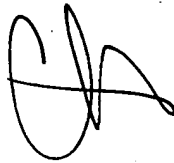

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Other references of interest include Tusa, Eccles, Rusin and Deguitre.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Upton whose telephone number is 571-272-1169. The examiner can normally be reached on 7:30-5:00, off every other Monday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
